Before You Start

- ⚠ Please read all instructions carefully.
- ⚠ Retain instructions for future reference.
- ⚠ Separate and count all parts and hardware.
- ⚠ Read through each step carefully and follow the proper order.
- ⚠ We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
- ⚠ Always place the product on a flat, steady and stable surface.
- ⚠ Keep all small parts and packaging materials for this product away from babies and children as they potentially pose a serious choking hazard.

Instructions for using the mirror:

1. Please handle with care! Edge damage can cause the glass to break suddenly.
2. The mirror must be installed and debugged by a qualified professional electrician. Avoid personal mistakes causing mirror damage or dumping accidents.
3. Before installing the mirror, be sure to cut off the circuit power supply. Different wall materials require different types of mounting parts. Please select suitable screws according to your requirements to ensure safety.
4. The plug part should not be exposed to water or sprayed. If you cannot guarantee it, you need to add a professional socket waterproof box to the socket.
5. Touch the switch on the mirror to switch between white light, yellow light and natural light. Long press to adjust the brightness.

The installation process is shown in the figure below:

1. First, drill holes on a solid wall with a suitable hole pitch.
2. Put the wall anchor into the pre-drilled hole, and twist the screw B to the proper length.
3. Hang the mirror on the twisted screw B.
4. Finally connect the plug adapter D.
