# **Before You Start**

Please read all instructions carefully and keep it for future reference.

#### Warning

Attention: Children should use this product under the parental supervision.

**Danger:** Keep all small parts and packaging materials for this product away from babies and children, otherwise they may pose a choking hazard.

# WARNING: CHOKING HAZARD

-Small parts.

Not for children under 3 years.

#### **General Warnings**

- ↑ The product must be installed and used under the supervision of an adult.
- Remove all packaging, separate and count all parts and hardware.
- Please ensure that all parts are correctly installed, incorrect installation can lead to a danger.
- Me recommend that, where possible, all items are assembled near the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
- ★ Ensure a secure surface during installation, and place the product always on a flat, steady and stable surface.

#### **NOTICE**

#### Please read over the NOTICE before use!

- Dedicated power adapter shall be used, and in case of adaptor damage, replace it immediately.
- The keyboard can only be disassembled by professionals, and no change can be made to the internal structure. In case of any functional abnormality during performance, stop performing immediately and send the keyboard to professionals for maintenance.
- When connecting the keyboard to other device, ensure both the keyboard and the device to be connected are powered off before connection.
- Do not turn and keep the volume to the maximum or to an uncomfortable degree for a long time when performing.
- Keep the keyboard away from heat source to protect its parts from damage.
- Prevent liquid, dust, small particle and other foreign matters from entering the case of the keyboard, which may result in element short circuit.
- Pull out the plug before cleaning the keyboard, and do not pull out the plug with wet hand.
- Please use dry and soft cloth to clean the keyboard. Paint, alcohol or other chemical solvents shall not be used for cleaning, which may damage the keyboard surface.
- Please pull out the plug after performing or when the keyboard is left unused for a long time.

# II. Performance Preparation

# Installing batteries

The instrument requires the use of six 1.5V "AA" batteries. Open the battery compartment cover on the backside and load in the batteries one by one with correct polarity. Replace the cover when the compartment is fully loaded.(Batteries are not included) \*Energy or voltage dissipation will result in the loss of volume and timbre distortion. Discharged or bad batteries MUST be replaced immediately to ensure the effect of performance. Always remove the batteries when you are not using the product for a long time.

### Power adaptor

A dedicated power adapter shall be used. Connect the output end of the adaptor to the power port on the rear of the keyboard, and then the other end to the power socket. (Note: the input voltage of the adaptor shall be compatible with the power supply voltage)

### Audio output / external headphone

- ◆ Audio output: firstly, turn off the keyboard and the external audio devices, secondly, connect one end of the audio cable to the PHONES/OUTPUT port on the rear panel of the keyboard, and then connect the other end to the audio input port of the audio devices.
- ◆ Headphone connection: When connecting a headphone to the PHONES/OUTPUT port on the back of the keyboard, the loudspeaker will be disenabled automatically. In this way, you can perform without disturbing others.
- X Note! When using a headphone, do not turn up and keep the volume to the maximum for a long time, which may cause hearing loss.

# Mic Input and Audio Input

- ◆ Mic input: Connect a microphone to the MIC port to sing while playing the keyboard.
- ◆The Keyboard is equipped with a stereo input function. Sound signals from mobile phone, MP3 player, computer and other audio devices can be input into the keyboard system for playing. Firstly, turn off the Keyboard, connect one end of audio cable (not included) to the output port of an audio device, and the other end to the AUDIO INPUT port on the rear panel of the Keyboard, and then turn on the keyboard.

# III. Basic Performing Method

Press [ POWER ON/OFF ] button, and the keyboard will light up from both sides, and the LED display will turn on and show the current tempo "120". Then you may play the Keyboard as required.

#### Luminous keyboard

The keyboard is provided with luminous function, under the modes of playing, training and playing demo song, the light hint will be provided. The luminous function is defaulted to be enabled, press [KEY LIGHTING] to enable or disenable the luminous function.

#### Master volume adjustment

Press [ MASTER VOL +] or [ MASTER VOL - ] to increase or decrease the overall volume.

Press [MASTER VOL+] and [ MASTER VOL – ] simultaneously to reset to the default value.

The master volume can also control the accompaniment volume.

### Accompaniment volume adjustment

Press [ACCOM VOL +] or [ACCOM VOL -] to increase or decrease the accompaniment volume.

Press [ACCOM VOL +] and [ACCOM VOL -] simultaneously to reset to the default value.

#### Timbre selection

The keyboard provides 255 timbres, from "000" to "254", for your selection. When turning on the keyboard, the timbre selection function will be turned on automatically. When under other states, press the [TIMBRE] button to enable the timbre selection function. The timbre is defaulted to be "000", and it can be adjusted by pressing the corresponding number buttons or pressing the "+"/"-"button.

### Playing Percussion

This keyboard provides 61 kinds of keyboard percussions. Press the [KEYBOARD PERCUSSION] button to convert the key to percussion key. Each key corresponds to one percussion instrument. Press this button again to disenable the keyboard percussion function.

# Playing demonstration songs

50 demo songs have been stored in the Keyboard, from "000" to "049", for your selection.

Press the [Demo one] button, the system is in the state of playing, the present demo song repeatedly. For another one, press the button to stop the present song, and again to play the next one.

Press the [Demo all] button, the system is in the stage of playing all the demo songs successively.

In the course of playing demo songs, the timbre of the songs can be changed.

# IV. Auto Rhythm

# • Rhythm selection

This Keyboard provides 255 rhythms, from "000" to "254", for your selection, and the rhythm is defaulted to be "000". Press the [Rhythm] button to enable the rhythm selection function. After "RHYM" is shown on the display, press the number buttons or the "+"/"-" buttons to select other rhythms.

#### Rhythm control

- 1. Activation
- ◆ Press [ START/STOP ] to start accompaniment rhythm.
- ◆ Press [ SYNC ], after "SYN" is shown on the screen, play any key in the chord key zone (the 1st-19th key, from left), the accompaniment rhythm will be activated.
- 2. Fill-in

After the accompaniment rhythm is activated, press [FILL-IN] to have a temporary rhythm play during the accompaniment rhythm. If press and hold [FILL-IN], the temporary rhythm will continue.

- 3. Stop rhythm
- ◆ During the accompaniment rhythm, press [ START/STOP ] to stop the accompaniment rhythm.

#### Metronome

The metronome contains four tempos, 1/4, 2/4, 3/4 and 4/4, respectively. Press the [Metronome] continuously to select the four tempos. Press the [Metronome] bottom again to stop the tempo.

# Tempo adjustment

Press [TEMPO + ] or [TEMPO – ] to increase or decrease the rhythm speed. Pressing the two buttons simultaneously may reset to the default.

### V. Auto Bass Chord

# Single chord

# Single Chord Fingering

When the rhythm is activated, press [ SINGLE ]. After the "SIN" is shown on the screen, you can play a single chord on the keys in the chord zone of the keyboard.

Press [ SINGLE ] again, the single chord function will be disenabled.

# • Fingered chord

Fingered Chord Fingering (C Key)
(The C key fingered chord fingering is as shown in the following figure, and the rest can be obtained by analogy)

When the rhythm is activated, press [ FINGERED ]. After the "FIN" is shown on the screen, you can play a fingered chord on the keys in the chord zone of the keyboard.

When [ FINGERED ] is pressed again, the fingered chord function will be disenabled

# VI. Status memory function

With the status memory function, you can save the tone, rhythm, tempo and other parameters to be changed during playing, for fast shifting. This keyboard is equipped with 4 status memories, which can be flexibly called at any time during playing.

# Storage of status memory

Set the tone, rhythm, tempo and chord as required, and then press the [MEMORY] button and one of [M1] to [M4] to save the current status.

# Calling of status memory

Press any one of [M1] to [M4] to call the setting parameters saved under this memory to replace the current status.

XNo power failure protection is provided for the saved contents, and the saved contents will loss after the electronic keyboard is restarted after power cut.

#### VII. Effect Control

### Transposing function

With the transposing function, you can play music of other tunes with C-tune fingering method. Press the [Transpose-] to decrease the tone by half-tone (minor second), and the tune in C-tune keyboard zone will change to B-tune. Press the [Transpose+] to increase the tone by half-tone (minor second), and the tune in Ctune keyboard zone will change to #C tune or bD tune. When pressing the [Transpose-] for twice, C-tune will shift to bB-tune, when pressing the [Transpose+] for five times, C-tune will shift to F-tune. Press [Transpose+] and [Transpose-] simultaneously to recover to C-tune "00". Press [Transpose +] and [Transpose -] to adjust the level from "P-6" to "P06".

#### Sustain function

Press [Sustain], "SUS" will show on the display, and the sustain effect will be activated.

Press this button again to disenable the sustain effect.

#### Vibrato function

Press [Vibrato], "VIB" will show on the display, and the vibrato effect will be activated.

Press this button again to disenable the vibrato effect.

#### Keyboard splitting function

Press [SPLIT] to enable the keyboard splitting function, "SPLIT" will show on the display. 24 keys on the left of the keyboard will split with the remaining keyboard. While the left keyboard zone will increase by one octave and maintain the original tone, the right keyboard zone will decrease by one octave to maintain the same pitch with the left keyboard zone. The tone of the right keyboard zone can be set as needed so different tones can be played by the left and right keyboard zones at the same time.

Press [SPLIT] again to disenable this function.

# VIII. Recording and Rhythm Programming

### Recording

Press the [ REC ] button "REC" will show on the screen display. Under this mode all playing notes will be recorded. When the storage is full, "REC" will blink on the display, and recording will stop automatically.

- ◆ Press the [ PLAY ] button to playback the recorded notes, and "PLAY" will show on the screen display. On completion of playback, it will return to the recording mode. You can record a new melody, or you can press [ PLAY ] to playback the recorded melody.
- ◆ Press [ START/STOP ] or press [ REC ] again to disenable the recording function, and all recorded notes will be removed.

# • Rhythm programming

When the rhythm programming function is enabled by press [ PROG ], "PRG" will show on the screen, and the keyboard percussion will be activated. Under this mode, you can create custom rhythms by playing the corresponding percussion key.

- ♦ 32 percussions can be recorded at maximum; after that "PRG" will blink on the screen and programming will stop automatically.
- ◆ Press [ PLAY ] to playback the programming rhythm. By pressing [ PLAY ] again to stop playback, "PRG" will show on the screen and programming function will be enabled. You can re-programming hythms or you can press the [ PLAY ] button again to playback.

Press [ PLAY ] to playback the programming rhythm.

◆ Press [ START/STOP ] or press [ PROG ] again to disenable the programmingfunction, and all recorded rhythm will be removed.

# IX. Luminous Key Three-step Intelligent Training

# Training 1:ONE-KEY

Press [ ONE-KEY ] to enable the one-key training function. You can select the song to be learned by pressing the number buttons or the "+"/"-" button. The luminous keyboard will light on according to the main melody notes, indicating the note to be played, and you can perform by following the guidance of the lighted key. Training 1 aims at duration learning, and there is no requirement on pitch or creativeness. This mode allows for mistakes when playing the keys, but the keyboard still plays correct notes, and the screen will show the correct notes.

After one song is finished, repeat the current song to be learned.

Press[ START/STOP ] or press [ ONE-KEY ] to disenable the training function.

# • Training 2: FOLLOW

Press [ FOLLOW ] to enable the Follow Training function. You can select the song to be learned by pressing the number buttons or the "+"/"-" button.

With teaching Training 2, you can learn by following the correct playing notes. You can play according to the demonstration song, the key will light on according to the melody notes, indicating the notes to be played, and you can play correctly by following the guidance. You can also learn by following the notes shown on the screendisplay, it will wait for you to play the correct note before it moves to the next one.

 $\times$  Note: Under this state, the Keyboard plays only the correct notes, and gives no response to the wrong notes.

Press [ START/STOP ] or press [ FOLLOW ] to disenable the training function.

### • Training 3: ENSEMBLE

Press [ ENSEMBLE ] to enable the Ensemble training function. You can select the song to be learned by pressing the number buttons or the "+"/"-" button.

Training 3 aims at duration learning and correct notes play learning. The keyboard will screen the keynote and ensemble with you. The luminous keyboard will light on according to notes of the main melody, indicating the notes to be played, and you can play correctly by following the guidance of the luminous keyboard. You need to play the correct note according to the correct duration of the song. If a note is not played within 3 seconds, the keyboard will automatically play the correct note.

After one song is finished, repeat the current song to be learned.

Press [ START/STOP ] or press [ ENSEMBLE ] to disenable the training function.

# **Return / Damage Claim Instructions**

#### 

In case a return is required, the item must be returned in original box. Without this your return will not be accepted.

# $\triangle$ Take a photo of the box markings.

A photo of the markings (text) on the side of the box is required in case a part is needed for replacement. This helps our staff identify your product number to ensure you receive the correct parts.

#### 

A photo of the damage is always required to file a claim and get your replacement or refund processed quickly. Please make sure you have the box even if it is damaged.

# $\boldsymbol{\triangle}$ Send us an email with the images requested.

Email us directly from marketplace where your item was purchased with the attached images and a description of your claim.
