Before You Start

Please read all instructions carefully and keep it for future reference.

Warnings:

Attention! Use it with protective equipment.

Attention! Not use it in the traffic.

Attention! The product is not suitable for the children under 3 years.

General Warnings:

- ⚠ The product must be installed and used under the supervision of an adult.
- ⚠ Read through each step carefully and follow the proper order.
- ⚠ Remove all packaging, separate and count all parts and hardware.
- ⚠ Please ensure that all parts are correctly installed, incorrect installation can lead to a danger.
- ⚠ We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
- ⚠ Ensure a secure surface during construction, and place the product always on a flat, steady and stable surface.
- ⚠ Please use the product carefully, as the product requires great skill, avoid accidents by the user or others, by fall or collision.
- ⚠ Please wear suitable protective equipment during use, e.g. protective helmet, gloves, knee pads, elbow pads etc.

WARNING!

•To reduce the risk of injury, adult supervision is required. Never use it in roadways, around motor vehicles, steep inclines or steps, swimming pools or other water places. Always wear shoes and helmets.

•**Limited to one person.**

•**TO PREVENT FIRE AND ELECTRIC SHOCK:**

•Only use batteries and chargers provided or specified by the manufacturer. Using the wrong type of batteries or chargers could cause a fire or explosion.

•**DO NOT** use the batteries or chargers on any other product. Or overheating, fire or explosion could occur.

•**NEVER** modify the circuit system. Alterations could cause a shock, fire or explosion.

•**DO NOT** pour any type of liquid on the batteries or other components. Explosive gases are produced during charging.

•**DO NOT** charge near heat or flammable materials. Charge in a well-ventilated area ONLY. Charge in a dry area ONLY.

•**DO NOT** open the batteries. Batteries contain lead and other toxic and corrosive materials.

•**DO NOT** open the chargers. Exposed wiring and circuitry may cause electric shock.

•**ONLY ADULTS** can handle or charge the batteries. NEVER allow children to handle or charge the batteries. Batteries are heavy and contain lead acid (electrolyte).

•**DO NOT** drop the batteries. Otherwise permanent damage or other serious injury to the batteries would occur.

•Before charging, check the wear and damage of the battery, charger and the connectors.

•**DO NOT** charge the battery if any damage to parts has occurred. Please contact the dealer or manufacture to replace the parts ONLY.

•**DO NOT** allow the battery to drain completely; charge the battery after each use or at least once a month if not used regularly.

•**DO NOT** charge battery upside down.

•Always make sure that the battery is fixed with the bracket. Otherwise, battery can fall out and even injure a child if the vehicle tips over. Risk of fire. Do not bypass.

•**If a battery leaks**, avoid it from contacting with the leaking acid and put the damaged battery into a plastic bag. Refer to information in "Disposal of Battery" for proper disposal.

•**If acid comes in contact with skin or eyes**, rinse with cool water for at least 15 minutes and call for a doctor.

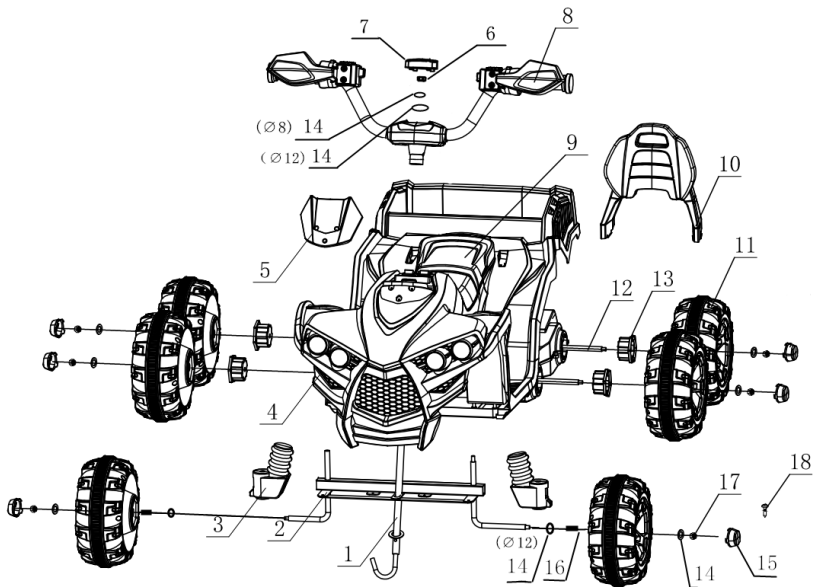

•**If mistakenly take a large number of acid**, take a large amount of water immediately. Call a physician.

Specification Instruction

Name	Specification
Battery	12V10AH*1
Fuse	15A
Motor	12V*4
Applicable age	3 years old and above
Maximum load	66 LBS
Charge time	Charge 8-12 hours
Charger	12V900MA
Speed	3-6KM/h

※Above parameters are selected for customers, the specific parameters is based on the actual parameter.

Owners Manual With Assembly Instructions

WARNING: To reduce the risk of injury, adult supervision is required.

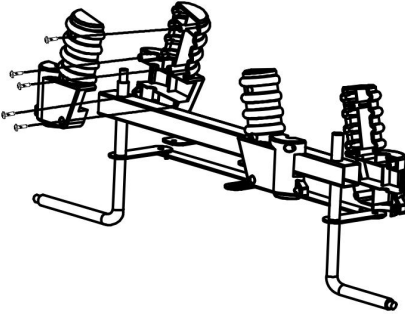

Never use in roadways, near motor vehicles, on or near steep inclines or steps, swimming pools or other water places; always wear shoes, and never allow more than 1 rider.

WARNING: ASSEMBLY SHOULD BE DONE BY ADULTS

Installation Instruction

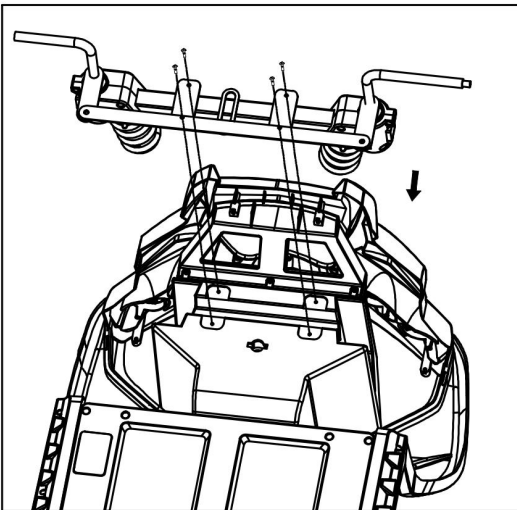

1. Installation of decorative parts

First, the front and rear cover of the decorative pieces is stuck on the iron pipe, and then 10 M4X12 round-head self-tapping screws are locked and fixed. The installation of the left and right of the decorative pieces is the same.

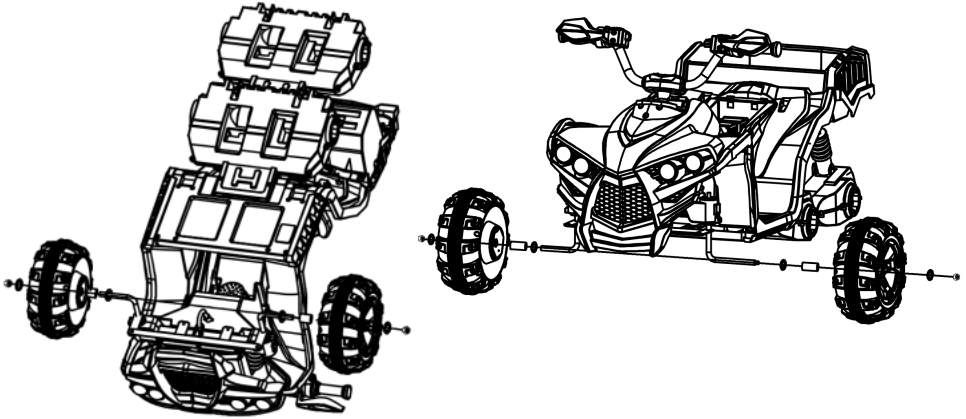

2. Installation of iron frame

Put the iron parts into the corresponding position of the body as the direction shows, and lock them with 4 M4X16 flat-head self-tapping screws. (Please pay attention to the installation direction)

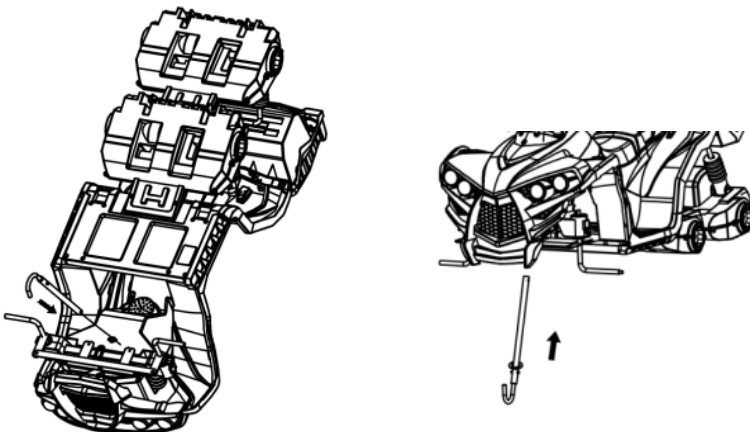

3. Installation of the front wheel

First put in the spacer, and then put the wheel with 1 axle sleeve (without drive plummer) into the steering shaft. Pad the spacer, and then lock it with M10 nut to fix. Press the wheel cover on the wheel.

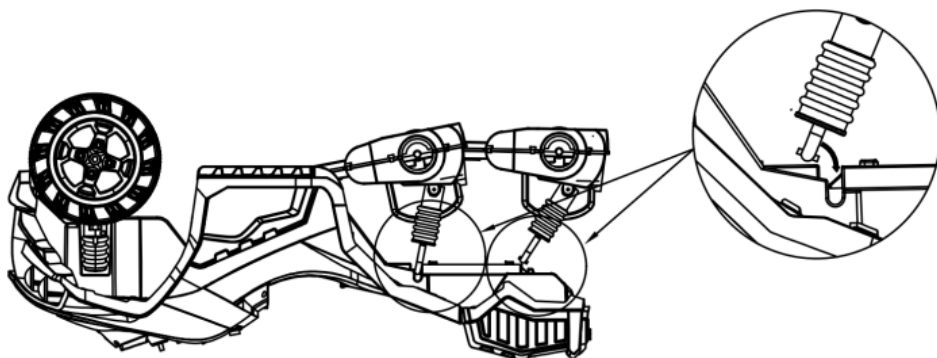

4. Installation of steering shaft

Insert the steering shaft into the body according to the body hole position.

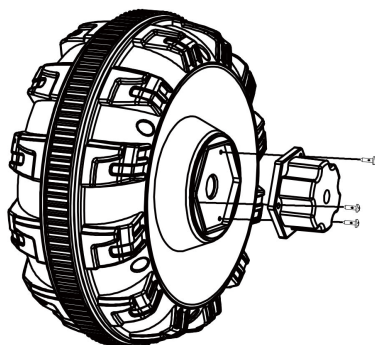

5. Rear wheel fixing

Snap the shock absorber shaft into the slot as shown in the picture.

6. Installation of driving plummer

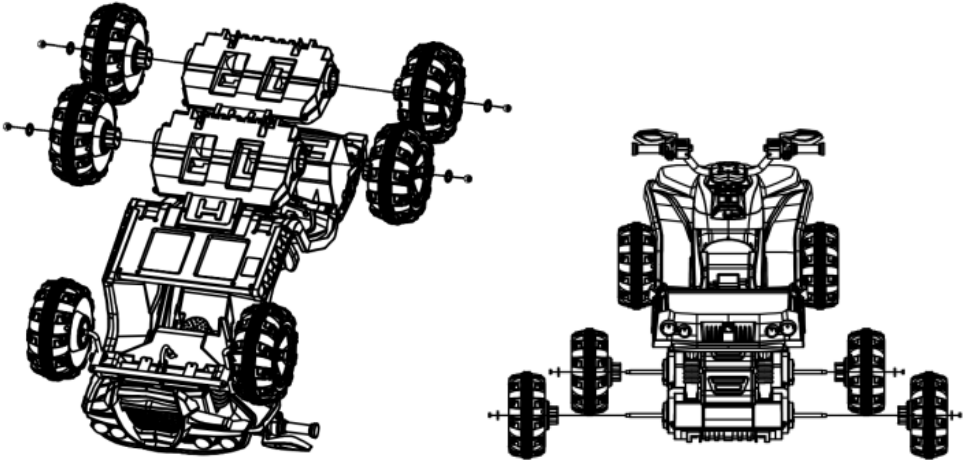

Drive plum and wheel first are fixed with three M4X12 round-head self-tapping screws. Four wheels need the same operation.

7. Installation of the rear wheel

A. First, put the two rear axles through the body

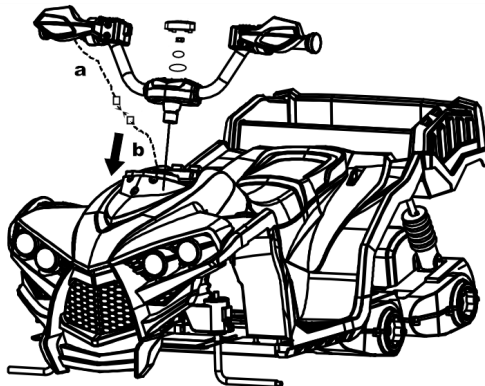

B. rear wheel (with drive plum) into the rear axle with drive motor, pad with spacers, and then lock with M10 mechanical screws. Press the wheel cover on the wheel.

8. Installation of tap

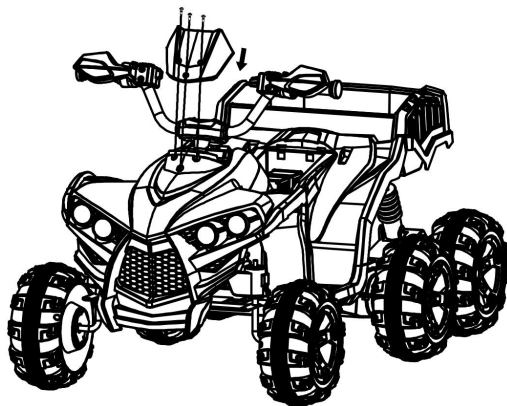

A. Connect the wire (a) from the right speed control handle on the mixer to the wire (b) on the body.

B. Insert the front fork into the steering shaft in the direction shown, fit the $\varnothing 12$ gasket and the $\varnothing 8$ gasket in turn, and then lock it with M8 nut to fix. Press the front fork cover.

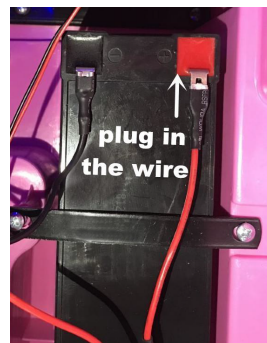

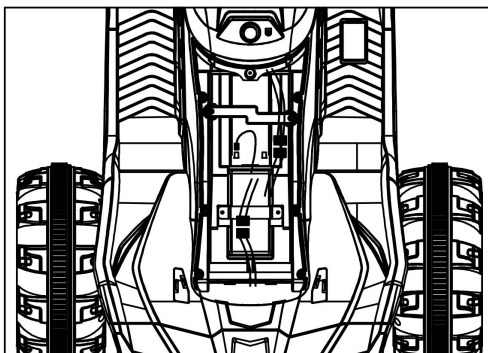

9. Installation of windshield

The windshield is fitted with the body as the direction shows in the picture, and is locked with three M4X12 round-head self-tapping screws.

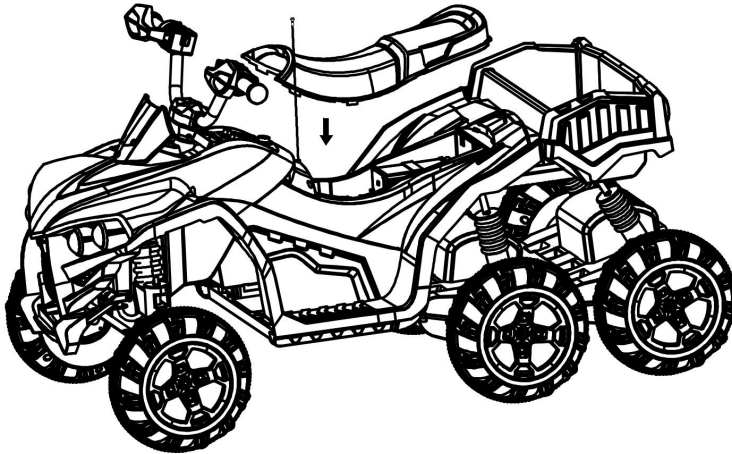

10. Installation of battery

Connect the power cord to the port corresponding to the color of the battery.

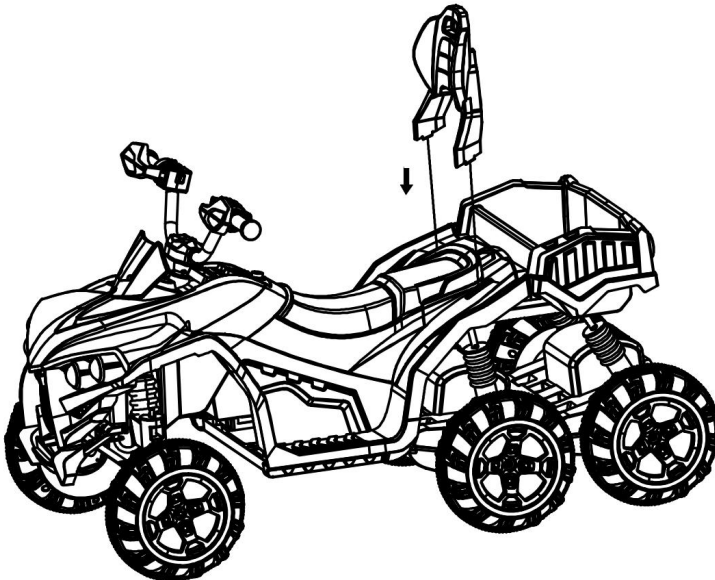

11. Installation of the seat

First, the tail unit of the seat is stuck into the body, and then the front of the seat is fitted with the body, and finally lock it with one M4X12 round-head self-tapping screw.

12. Installation of backrest

Snap the backrest into the body as shown in the picture.

Warning

To ensure your baby's safe driving, you must pay attention to the warnings below :

1. Assembly and adjustment of the product must be done by adults. Please keep children far away from the motion parts.
2. With many small parts, it is not suitable to be used by children under 3 years old!
3. Must correctly use the life belt when children sits. Don't be close to fire!
4. Children must use this product under the guidance of adults, and the guardian can't leave during the using process!
5. Don't allow the children stand or play on the foot pedal (or in the electric car).
6. Charging the storage battery must be done by adults. Please charge before using this product!
7. To avoid hurting children, please keep the package materials like plastic bag far away from children! Asphyxiation hazard!
8. Strictly forbidden to use any accessories which are not provided by the manufacturer.
9. Don't use charges as toys.
10. The maximum load of this car is 66 LBS. DO NOT overload.
11. The suitable age range of this car: 3 years old and above.
12. The toy can't connect to too many power suppliers which exceed the recommended numbers.
13. The toy (complete car) can't be operated during charging.

Notice for Charging

1. When using the electric car for the first time, the user must guarantee that the positive pole and negative pole of power supply have already been correctly connected. (The storage battery is installed in the engine plate at the front of car. Pay attention to different positive/negative poles when you connect. It needs red to red, black to black). Must guarantee that storage battery is charged for 8 hours, otherwise, it will perpetually damage the storage battery which can't recover.
2. Plug the DC plug of charger into the charge hole at first, and then plug the charger into power outlet.
3. Must charge in time after using about one hour each time. The normal charge time is from 8 to 12 hours, and charge time every time can not exceed 20 hours.
4. The heating appearance of charger and storage battery (Below 60°C) during the charging all are normal.
5. If there is stagnant water in the connect/plug part, it can't charge. Otherwise it may cause short circuit.
6. This electric car must use the charger and storage battery configured with this car to avoid damaging the charge, storage battery or electric circuit.
7. Charge at least once a month. If not using the electric car for a long time, plug out the connect/plug part of storage battery.

Notice for Use

1. Please check whether all parts are installed on right position. Tightly connect each part before using.
2. Do not use it in dangerous areas like slopes and ditches, etc.
3. Please don't use it on slippery ground, such as marble ground or tile floor, etc.
4. Don't shift forward/backward switches when the electric car is running. Please note that children are not allowed to stand on the seat.
5. Don't change the circuit and additional electrical devices of this car.
6. The remote controller and electric car can't be used in rain or water. Don't pour the water or other liquid on the car and keep it far away from the fire source to avoid causing circuit damage.
7. Electrical car stops running when it touches hinder, please avoid hinders when running it.
8. Don't use it in room to avoid cracking up the furniture or making children tumble.
9. When the remote controller is in low battery, the complete car can only be controlled forward and can't move to left/right direction, which shortens remote distance and generates tremors. Please replace the battery in time.
10. Please shut off the power supply switch when not using it and plug out the connect/plug parts of storage battery.
11. This product is limited to one person, which can't be overloaded. The maximum load capacity is 66 LBS.

Note: The product's introduction in this specification is only for reference, and for more information, please project to the physical entity.

Maintenance

- 1.To guarantee that your baby will not be hurt unexpectedly, please frequently check and maintain this car.
- 2.Check if package assemblies are complete before assembling. Contact us immediately if some parts are missing.
- 3.Check whether there are screws loose or parts damaged on a regular basis.
- 4.Please frequently check whether it is intact after every part is installed or used.
- 5.When disassembling, please operate according to the operating specification carefully to avoid causing unnecessary damage.
- 6.Please check the product and the charger on a regular basis, check whether wire, plug, outer shell and other parts are damaged and you should stop using it if any damage occurs.
- 7.Please do cleaning for this product regularly, and fill lubricating oil into rotating parts. Be careful and do not damage the electric elements. Don't use water to wash, but use dry cloth to wipe.
