3

**Product installation steps**

- Cut the strap with scissors.

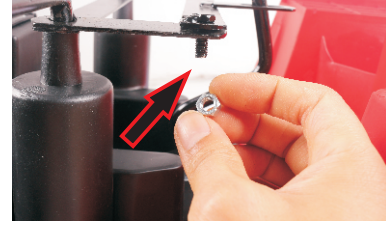

- Remove the nut from the steering lever.

- Thread the steering rod thread into the hole.

- Install the steering rod nut, turn the knob to the right into place.

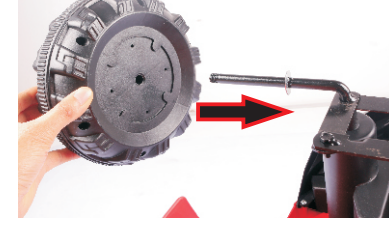

4

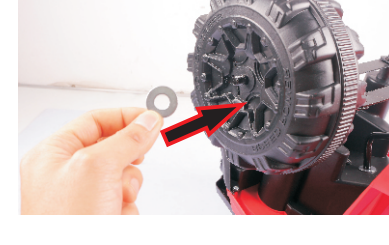

- Remove nut and 1 washer from front axle.

- The front wheels are smoothly facing inwards, align the front wheel axle holes, and fit the front wheels into place.

- Install the washer into the front axle and fit it to the wheel.

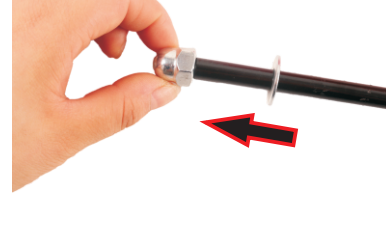

- Install the front wheel nut and turn the knob to the right into place.

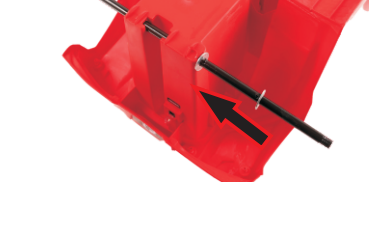

5

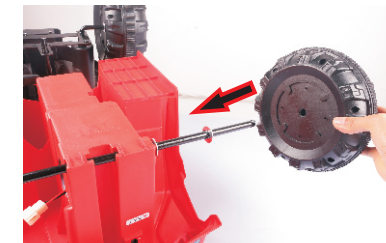

- Remove the nuts and washers on both sides of the rear axle.

- Put the smooth end of the rear axle into the hole of the car body from right to left.

- The rear wheels are facing inward smoothly, the holes are aligned with the rear wheel axle, and the rear wheels are put into place.

- Install the washer into the rear axle and fit it to the wheel.

6

- Install the rear wheel nut and turn the knob to the right into place.

- Plug the drive box port into place and hear a "click" when it is inserted, which proves that it is in place.

- Align the holes of the drive box with the rear axle, and install the box in place; as the box is installed, put the wire into the body at the same time.

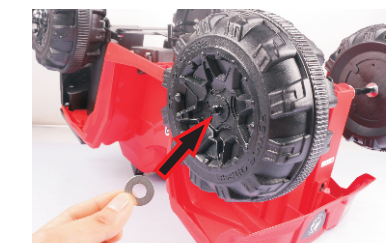

- Install the rear driving wheel with the teeth facing inwards, align the hole position with the rear wheel shaft, and then align the teeth of the tooth box to fit the rear wheel into place.

7

- Install the washer into the rear axle and fit it to the driving wheel.

- Install the rear wheel nut and turn the knob to the right into place.

- Remove the handlebar nut and screw.

- Install the handlebar into the steering rod. When installing, align the handlebar with the steering rod. The hole of the handlebar should be opposite to the hole of the steering rod.

8

- Insert the screw into the hole of the handlebar.

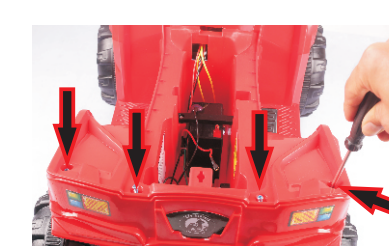

- Put in the handlebar nut.

- Using the screw tool, turn the screw to the right with the knob.

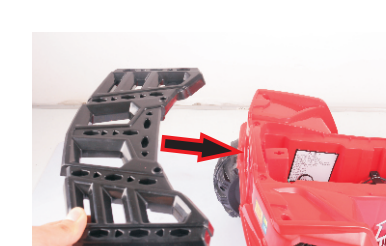

- Using a screw tool, turn the four screws at the rear tail position of the body to the left knob.

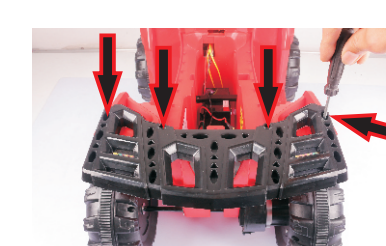

9

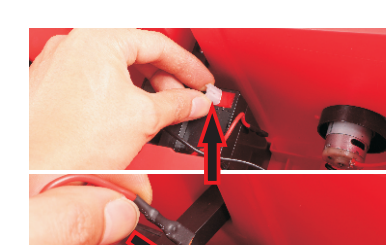

- Take the rear wing, align the screw holes, and put it into the body.

- Using the screw tool, turn the screw to the right with the knob.

- Take out the protective caps of the battery connection pins; plug the battery cable ports into place and hear a "click" when they are plugged in, proving that they are in place.

- Install the seat cushion lock, with the round head facing upwards, and press the lock into place with your hand. When you hear a "click", it proves that it is in place.

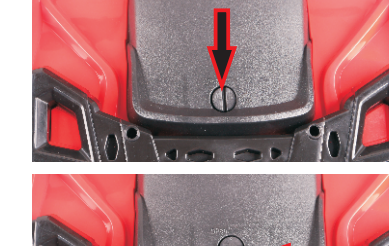

10

- Install the front of the seat cushion first, and then press the tail end of the seat cushion to install the seat cushion in place.

- The seat lock in the vertical direction shown by the arrow indicates that the seat is in the "open" state, and the seat lock in the horizontal direction shown by the arrow indicates that the seat is in the "closed" state.

- The product assembly is completed.
