## USER'S MANUAL

### Air Purifier ES10173US

THIS INSTRUCTION BOOKLET CONTAINS **IMPORTANT** SAFETY INFORMATION. PLEASE READ AND KEEP FOR FUTURE REFERENCE.

## Before You Start

- ⚠ Please read all instructions carefully.
- ⚠ Retain instructions for future reference.
- ⚠ Separate and count all parts and hardware.
- ⚠ Read through each step carefully and follow the proper order.
- ⚠ We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
- ⚠ Always place the product on a flat, steady and stable surface.
- ⚠ Keep all small parts and packaging materials for this product away from babies and children as they potentially pose a serious choking hazard.

## 1. Safety precautions

In order to avoid possible injury or financial loss to you or others, please pay attention to the following safety precautions.

If the power cord is damaged, in order to avoid danger, it must be repaired by the professional personnel, maintenance department, or similar departments.

### Warning

#### **Do not touch the power plug with wet hands.**

Otherwise, electric shock may be caused.

Wet hand  
forbidden!

#### **Before cleaning the electrical apparatus, make sure that the power supply has been disconnected.**

Otherwise, the air purifier may run suddenly, leading to electric shock accident.

Unplug!

#### **It is forbidden to use the specified value of power supply or linked equipment. Only 220V ~ AC power supply can be used.**

The use of universal socket or equipment beyond the specified value may cause overheating and fire accidents.

Forbidden!

#### **Please plug the plug into the power socket before starting the air purifier.**

If the plug is not fully inserted into the socket, it may cause electric shock and overheating, and even cause fire accident.

- Do not use damaged plugs or loose power outlets.

Forbidden!

#### **Do not damage the power cord and socket.**

When using the machine, do not bind the wires. Using the damaged wires may lead to electric shock, short circuit or fire accident.

- It is forbidden to cut, refit, over twist, twist, poke and pull wires, or place heavy objects on wires or sockets.

#### **Please clean the power plug regularly.**

If dust accumulates on the power plug, its moisture may damage the insulation part of the plug, resulting in fire accidents.

- Pull out the power plug and clean it with a dry cloth (do not use a wet cloth!).
- If the appliance is not used for a long time, the power plug should be removed.

Taking apart  
is forbidden!

#### **It is forbidden to disassemble or refit the air purifier without authorization.**

Unauthorized disassembly or modification of electrical appliances may lead to electric shock, failure or fire accident.

Forbidden!

#### **It is forbidden to place rods or other metal objects at the air outlet or opening.**

Otherwise, it may touch the internal parts and cause electric shock or damage.

**⚡ Warning**

- If you need to move the product, please disconnect the power of the product first.
  - Be sure to move the product slowly.
  - Do not move the product by pulling the power cord.
  - Do not move the machine while the product is in operation.
- If you need to move the machine, please turn off the power.

**⚡ Warning**

In case of any of the following conditions, please turn off the power of the machine immediately.

- If a switch does not work.
- If the circuit breaker works or the fuse burns out.
- If the power cord or plug is abnormally hot.
- If you find a burnt odor or abnormal sound or vibration.
- If there is any other abnormal phenomenon or fault.

**⚠ Warning**

Forbidden!

**It is forbidden to use benzene or thinner and other solvents to clean the air purifier, so as to avoid contact with insecticide sprays**

Otherwise, the air purifier may break and cause damage, even short circuit, resulting in electric shock or fire accident.

**Pull out the power plug, should hold the plug, should not pull the wire.**

If the wire is pulled directly, it may cause short circuit, or damage the wire, leading to fire or electric shock.

**It is forbidden to use this air purifier in places with greasy particles.**

For example, in the kitchen, the air purifier may break and cause damage.

- The air purifier shall not be used as ventilation or air extraction equipment.

Wetting  
forbidden!

**It is forbidden to use this air purifier in places with high temperature, humidity or wet body, such as bathroom.**

The air purifier may leak electricity and cause electric shock or fire accident.

**It is forbidden to use the air purifier in the room with fumigation insecticides.**

Chemical residues may accumulate in the unit and then be released from the air outlet, thus endangering health.

- After using insecticide, the room should be thoroughly ventilated before using the air purifier.

Keep away  
from flame!

**Do not let volatile substances or combustible materials, such as tobacco or sparks, float into the aircraft.**

Otherwise, fire accidents may occur.

Wetting  
forbidden!

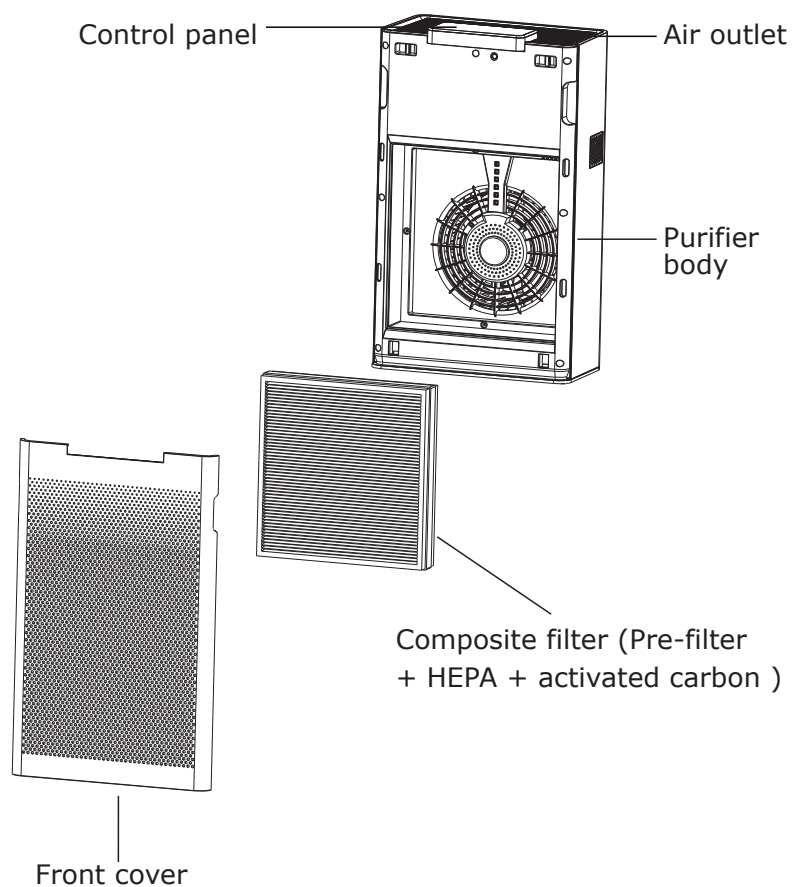

**Do not wet the fuselage.**

Otherwise, electric shock and fire accidents may occur due to short circuit.

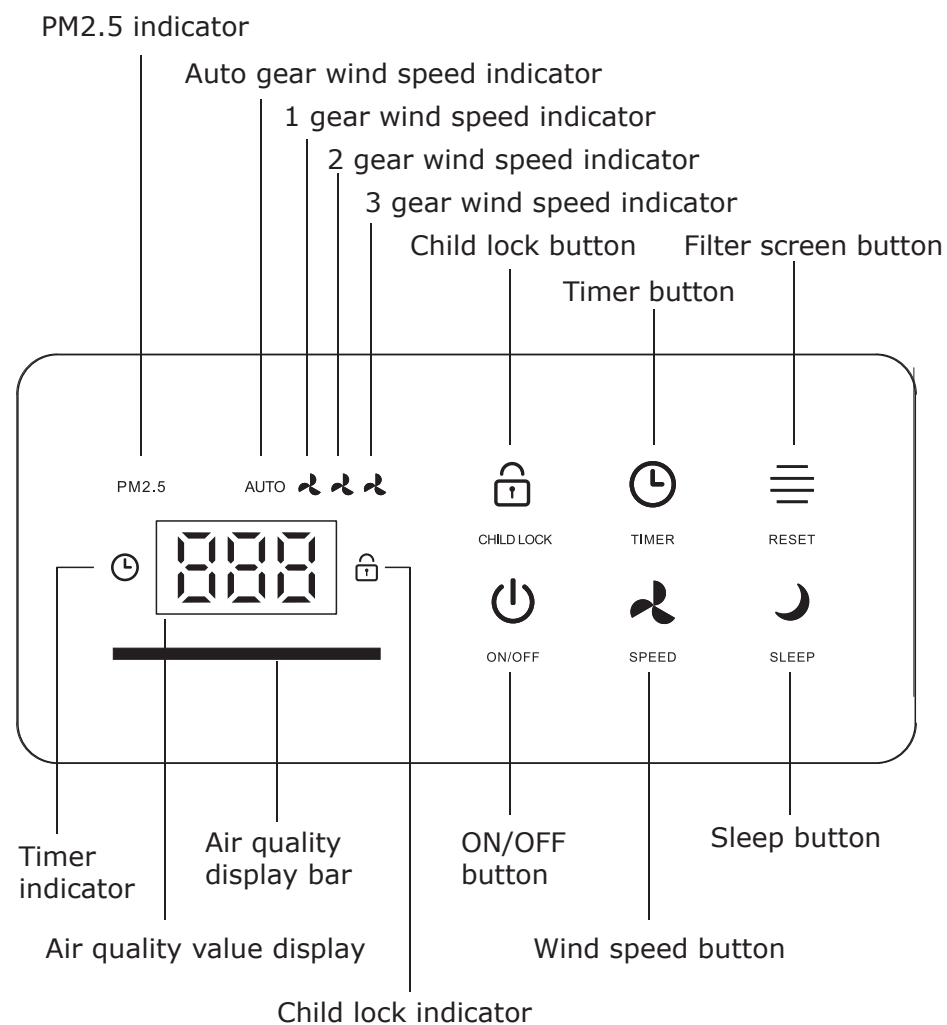

Keep the machine away from volatile substances or flammable items such as tobacco and sparks, or it may cause fire accident.

## 2. Product introduction

If there is any difference between the product picture and the real object, the real object shall prevail.

## Function description of control panel

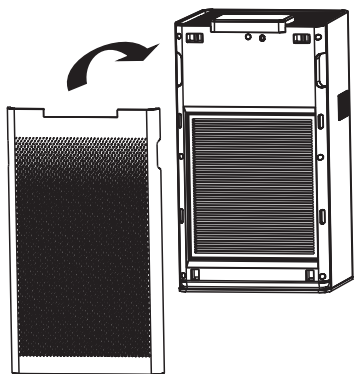

### 3. Before use

#### Removal and installation method of front cover plate

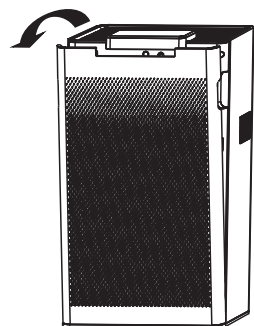

##### 1. Removal method of front cover.

Open the front cover as instructed

##### 2. Installation method of front cover.

Lift the front cover upwards and place it in place

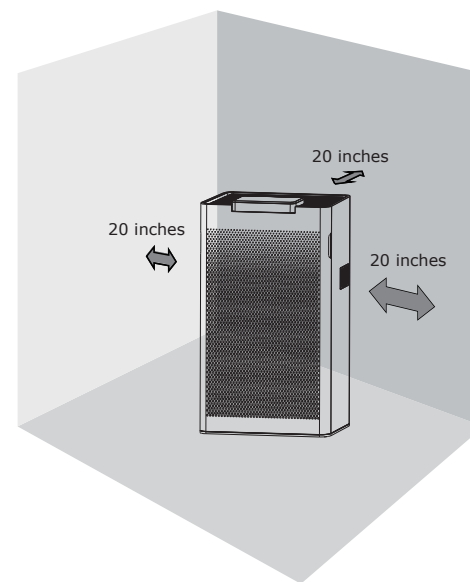

#### Placement of air purifier

To make sure good air circulation effect, please ensure there is 20 inches distance between air inlet and wall or curtain. Besides, the distance of air outlet is not less than 20 inches.

Please keep 39 inches or more distance from TV, radio.

Please do not use the same socket with TV, radio and other appliances which can avoid picture flutter or noise. It may make wall surface around machine body dirty if you place the machine in the same place for a long time. Do not obstruct air inlet and outlet, ensuring enough ventilation and high efficiency.

#### Install filter net

##### Information

This air purifier is equipped with a filter screen inside, but before using the product, be sure to remove the packaging of the filter screen. Please follow the instructions below to remove the filter and its package, and then install it into the purifier.

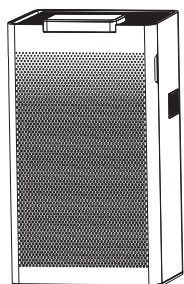

##### ⚡ ATTENTION

- Ensure that the power plug is installed, repaired and transported when the power supply is disconnected.
- Do not operate machines without filter.
- Remove the plastic packaging of the filter screen before use.

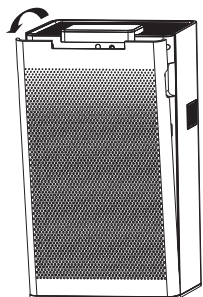

## Operating steps

When using the air purifier for the first time, please follow the steps below to install the filter correctly.

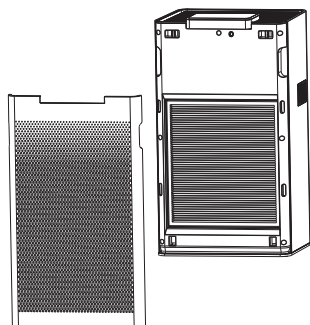

1. Remove all packaging materials and place the machine on a dry, stable, level surface.

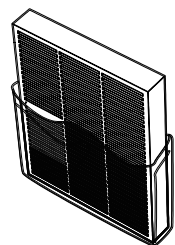

2. Lift the front cover plate up the syncline and place it in a proper position.

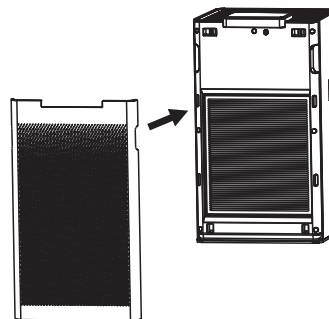

3. Remove the filter screen inside the purifier.

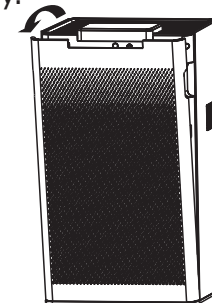

4. Remove the filter from the packing bag.

5. Put the filter back into the purifier.

6. Press the indicator key to close the front cover and press it tightly.

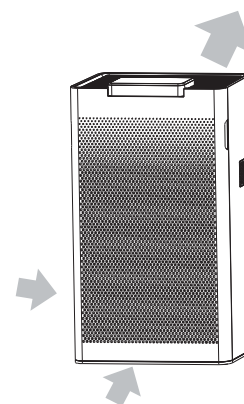

### Reminder

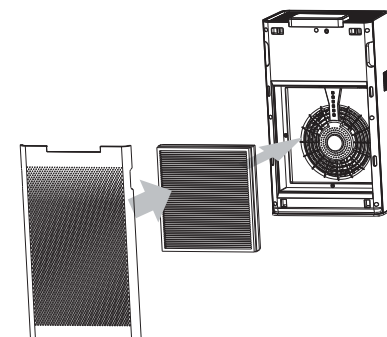

Please be careful when install the back cover, and watch out for pinch hands.

## Understand the function of filter net

Clean air output

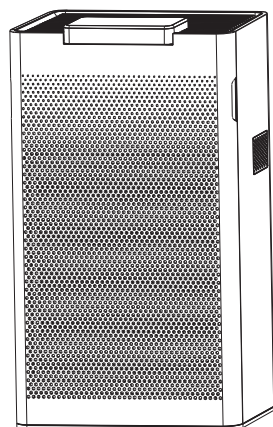

1. Polluted air entering

2. The polluted air enters the filter screen through the outside and outputs crystalline air from the middle to up.

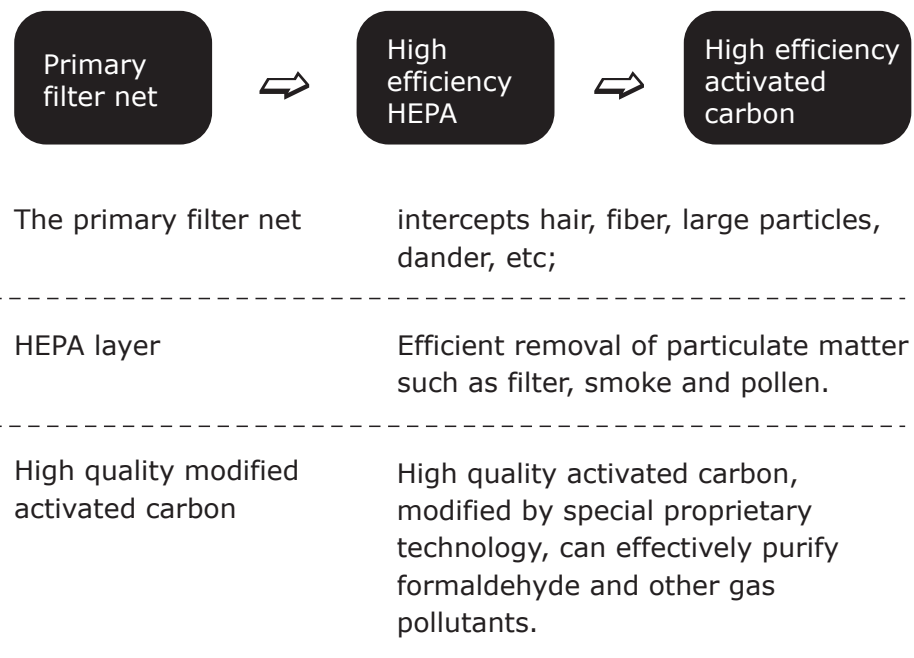

The picture is for reference only. If there is any difference between the real object and the picture, the real object shall prevail. Our company reserves the right to explain.

## Integrating multiple functions into one

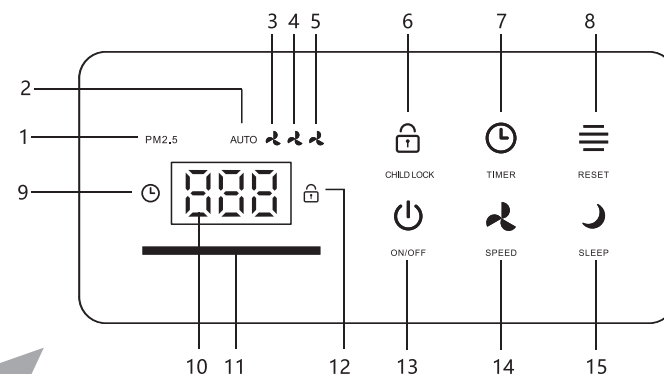

- Formaldehyde removal
- 4-speed design
- Timer setting
- Screen replacement tips
- It is equipped with manual mode, sleep mode and child lock mode

## Unique triple purification technology

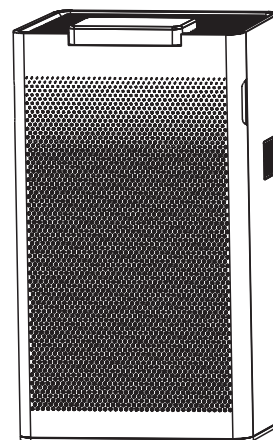

## 4. How to use

### Function description of control panel

- 1** PM2.5 indicator
- 2** Auto gear wind speed indicator
- 3** 1 gear wind speed indicator
- 4** 2 gear wind speed indicator
- 5** 3 gear wind speed indicator
- 6** Child lock button
- 7** Timer button
- 8** Reset button
- 9** Timer indicator
- 10** Air quality value display
- 11** Air quality display bar
- 12** Child lock indicator
- 13** ON/OFF button
- 14** Wind speed button
- 15** Sleep button

Red Light	——	Severe pollution

## 5. Maintenance and cleaning methods

Please pull out the power plug before cleaning.

Please do not put the product into water or any liquid

Please do not use cleaning agents with high abrasiveness, corrosibility, or inflammability (such as decolorizer or alcohol) to clean any part of this product.

The filter net can't be washed.

## Clean the air purifier

Clean inner side and outer side of air purifier regularly to prevent dust gathering.

1. Use soft and dry cloths to remove dust on the air purifier.
2. Use soft and dry clothes to clean air inlets and air outlets.

## Change the filter net.

### Information

When the indicator light of filter replacement flashes, it is to alert the user to replace the corresponding filter.

### ⚡ ATTENTION

When the product is working, the filter replacement indicator flashes, and the buzzer sounds a "ding ding ding" alarm, reminding the user to replace the filter, but the air purifier can still work normally.

### ⚡ ATTENTION

Please turn off the power and pull out the power plug before filter replacement. If the indicator light of filter replacement flashes again after replacing the filters, please press the reset button for 3 seconds until the indicator light is off.

### 💬 ATTENTION

Put the plastic filter into the machine before disassembly

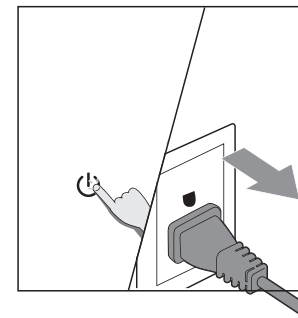

## Operating steps

1. The machine reminds to replace the filter.

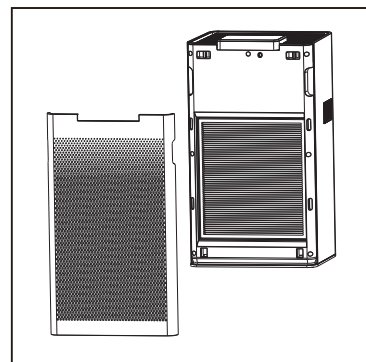

Filter screen

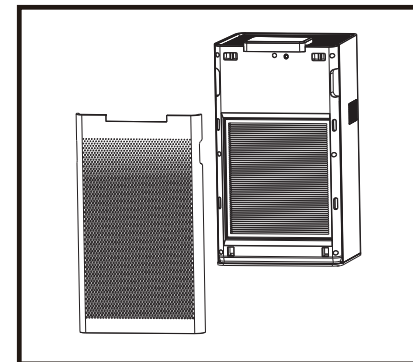

2. Turn off the power and pull out the power plug.

3. Hold the handle of the composite filter screen and gently take out the filter screen.

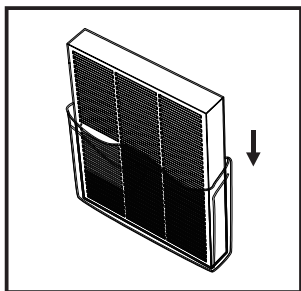

4. Remove the filter inside the air purifier and replace it.

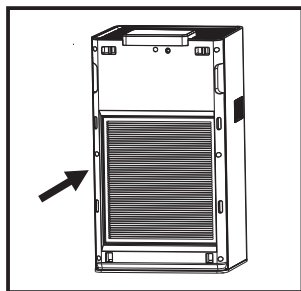

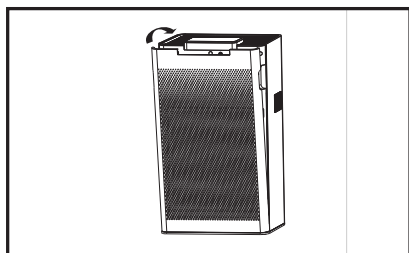

5. Remove the packages of the filters.

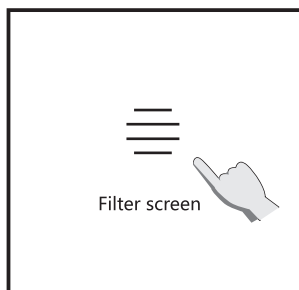

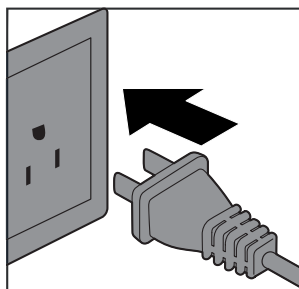

6. Install the filter into the purifier.

7. Put in the filter screen again, press the indicator key to put in the bottom cover and tighten it.

8. After replacing the filter, plug in the power plug and press the reset key for 3 seconds to reset the machine.

## When idle for a long time

Pull off the power plug. (because standby mode also consumes power.) Dry the interior thoroughly.

Store the machine in a dry and ventilated place. (keeping the product flat or upside-down may lead to product failure).

## Reference time for replacing filter screen

The filter screen of this product is Pre-filter + HEPA + activated carbon filter. The filter screen cannot be washed and is damaged. Please do not press it hard. The general service life is six months.

The above time is only a reference time, users can change it in advance according to the actual use environment.

### ATTENTION

Please shut down and cut off the power plug before replacing the filter.

## 6. Fault handling

The following table lists failures possible to appear in dairy use. Please contact company service center or dealer if you cannot find answer from the listed examples.

Status	Possible reason	Possible solution
Machine can not work	The back cover may not be installed correctly	Disassemble back cover and installed correctly, re-install it
	Machine cannot work Power supply for plug	Pull out the plug and pull in again
	Power plug or wire is wrong	Contact customer service center
