

# INSTRUCTION MANUAL

(Max.Load 150kgs)

Please ensure and carefully read the manual and the warning label on the ladder before use the ladder.

## Operation

1. Open: one hand holds the handle and another hand push the back of top step.
2. Lock: push the clip to ensure the clip lock the support bar firmly.
3. Fold: one hand holds the handle and another hand push the clip, then lift the back of top step.

## Warning:

1. It must to be operated by both hands.
2. Before using, the step stools should be wide opened and make sure the clip is functional.
3. Please use the step on smooth and flat ground without oil or water.
4. Only one person is allowed to use the step, not to exceed the load limit (it is very dangerous).
5. One is not allowed to move half of the body out of the ladder when working on the ladder, for it will overturn the ladder and cause the accident.
6. Mat is not allowed to put on the step for higher altitude. Because mat and ladder are not combined together, and accident of overturning will likely happen. If higher altitude is required, please use other kind of product .
7. Children are strictly forbidden to play, work or climb on the ladder in order to avoid injury.
8. If the ladder is broken, please do not use it in order to avoid injury.
